ABOUT THE APCO FRAMEWORK

The APCO Packaging Sustainability Framework (the Framework) aims to provide a consistent and transparent framework for assessing and tracking packaging sustainability across organisations. The Framework consists of thirteen independent criteria that belong to three separate categories. These categories are (i) Leadership, (ii) Packaging Outcomes and (iii) Operations. The diagram above shows the different criteria included within each of these three categories.

There are two types of criteria within the Framework:

- **Core criteria** are mandatory and must be answered by all Members when completing the Annual Reporting Tool.
- **Recommended criteria** are not mandatory, but Members are encouraged to complete as many recommended criteria as possible.

Each criteria is divided into five levels of performance ranging from 'getting started' to 'beyond best practice'. The diagram above illustrates the key differences between performance levels. Please see www.packagingcovenant.org.au for more information.

ABOUT APCO

APCO is a co-regulatory, not for profit organisation that partners with government and industry to reduce the harmful impact of packaging on the Australian environment. APCO promotes sustainable design and recycling initiatives, waste to landfill reduction activities and circular economy projects. APCO Annual Reports are a key Membership obligation, providing Member organisations with a transparent method to track their packaging sustainability performance. Annual reporting also supplies APCO with valuable data and information to identify industry trends and advancements.

FREE FORM QUESTIONS

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability.

Wishart's Paint Solutions participated in the NSW EPA Bin Trim Program, a program designed to reduce waste to landfill. It was identified that the organisation had a diversion rate of 61% upon commencement and a diversion rate of 78% upon completion. This shift was largely attributed to the diversion of pallets and an amendment in the collection frequency from fortnightly to monthly for the general mixed waste bin. Other notable outcomes of the Program include the discontinued use of black plastic pallet wrap as this material is no longer collected on site and it can be assumed that this will also be the case for businesses in the Wishart's Paint Supplies supply chain. In addition, paper recycling bins were introduced into the office area and bin signage was improved within the warehouse.
